DSE705 Auto Transfer Switch Control Module **R 1 250.00 Excl. VAT**

While stocks last! These are net special prices, and no other discounts are due.

- The DSE705 are designed to monitor mains, when the mains fails the module sends a start request to the generator control module. When the generator is available, the module will open the mains and transfer the load across to the generator. When mains returns this will be done in reverse.
- Manual starting. Protected Solid State Outputs. Front panel mounting. Front panel programming. LED indicators. Configurable timers and outputs. Remote start input.
- Single/three phase mains sensing.
- 3 button simple operation. 1st button starts the generator and loads it. 2nd button starts the generator but leaves it off load. 3rd button is to leave the module in automatic.
